CLINICAL NOTE: Routine 6-month well-child examination and developmental screening.

PATIENT: 6-month-old female infant brought by parents.

GROWTH AND NUTRITIONAL ASSESSMENT:

Weight: 7.6 kg (54th percentile). Length: 66 cm (58th percentile). Head Circumference: 43 cm (52nd percentile).

Feeding: Exclusively breastfed on demand every 3 to 4 hours. Parents have recently initiated iron-fortified single-grain rice cereal and pureed avocado with good acceptance and no emesis or allergic reactions.

Sleep: Sleeps 7 to 8 hours consecutively at night in her own crib on her back; takes two daytime naps.

PHYSICAL EXAMINATION:

General: Alert, happy, active infant babbling and smiling spontaneously.

HEENT: Anterior fontanelle open, soft, flat, measuring 2 x 2 cm. Red reflex present and symmetric bilaterally without strabismus. Tympanic membranes pearly grey and mobile. Oropharynx clear; lower central incisor teeth erupting without thrush.

Cardiovascular: Normal S1 and S2, regular rate, no murmurs. Strong femoral pulses.

Lungs: Clear to auscultation bilaterally without wheezing or crackles.

Abdomen: Soft, non-distended, no organomegaly or umbilical hernia.

Genitalia: Normal infant female external genitalia.

Musculoskeletal: Symmetrical skin folds; negative Ortolani and Barlow maneuvers (stable hip joints).

DEVELOPMENTAL MILESTONES (ASQ-3 SCREENING):

- Gross Motor: Rolls over in both directions (front-to-back and back-to-front). Sits independently with hands propped in a 'tripod' position for several seconds. Bears weight on legs with bouncing motion when supported upright.

- Fine Motor: Reaches for toys with both hands; transfers a rattle from one hand to the other; uses palmar grasp.

- Language/Social: Responds to her name by turning head; makes consonant-vowel combinations ('ba-ba', 'da-da'); smiles at mirror image and imitates sounds.

VACCINATIONS AND ANTICIPATORY GUIDANCE:

1. Administered routine 6-month immunizations: DTaP #3, IPV #3, Hib #3, PCV20 #3, Rotavirus #3, and Hepatitis B #3.

2. Discussed child safety: Lowering crib mattress to lowest setting, poison control, avoidance of honey before age 1, car seat rear-facing orientation.
